

COPPER-NICKEL CLAD

**FOR ANODE TABS
AND MORE**

Wickeder Group

www.wickeder.de

Ni/Cu tabs improve joining of the Copper anode to the negative terminal of the can. Ni/Cu/Ni also provides thermal benefits in higher power applications. Copper Nickel provides high conductivity lead material to lower heat generation and improve safety.

Advantages:

- > Outstanding electrical and thermal conductivity (4x better than nickel)
- > Very good connectivity
- > Optimal corrosion resistance
